

To download MP3 audiobooks to your MAC:

1. Install the “OverDrive Media Console” to your Mac. You can download the OverDrive Media Console from "<http://www.overdrive.com/software/omc/>".
2. Select the “Mac” option, click the “Download Now” button and follow the prompts to install the OMC software.
3. Now you can search the library's catalog for MP3 audiobooks to download onto your Mac.
4. If the book is currently available to check out, follow the following steps to check it out and download it:
5. Click the “Checkout” button.
6. If you have not logged in yet you will be prompted for your name and library card number.
7. Enter how long you want to checkout the title (7, 14, or 21 days) and click - "Check Out".
8. After the title is checked out you can access it within your account.
9. From your account, select the “Download OverDrive MP3 Audiobook” button.
10. The title will appear in your Downloads with a .odm extension.
11. Open OverDrive Media Console and drag the downloaded file to the OverDrive Media Console.
12. OverDrive Media Console will then download the title to your Mac where you can listen to it.
13. Now that the Audiobook has been downloaded you can transfer it from OverDrive to an MP3 player, iPod, smart phone, burn to CD and/or listen to the audiobook directly from Overdrive on your computer
 - Note - Books return automatically on the due date. At this time there are no overdue fines, no way to return audiobooks early, and no renewals on items.
